***Pirate Problems*: Headlines**

Modern day pirates, Blackbeard, and 11 sunken treasure ships; psychic teen friends Max Myers and Jinx MacKenzie have their hands full of problems when they become stranded during the hurricane of 1715...and Blackbeard is NOT happy!

Summary:

Psychic teenage friends Max Myers and Jinx MacKenzie are having troubling visions again. Max finds himself visiting a beach during a raging hurricane and trying to save a boy who looks disturbingly like himself. Jinx witnesses cut throat pirates as they carry through a bloody raid on an English ship.

It's only when they meet in Sebastian, Florida during spring break that they begin to connect the clues. They learn of a monstrous hurricane that sank eleven Spanish treasure ships off the coast in 1715. Max is convinced that this is the vision he had and is sure that he must return to save the boy.

Taking his cat, Poppy, Max tries a Guided Time Travel for the first time without Jinx and Petey. What he thought would be a quick trip becomes a tragedy when he finds himself stranded in time.

Jinx is furious with Max when she and Petey finally catch up with him. But finding a way back home for Max is the least of their worries when Blackbeard and his swarthy gang of misfit pirates show up to steal the treasure.

In the end, Max learns his biggest lesson yet about friendship: good friends always stick together through thick and thin during life's surprising journey.
